The French Government has ordered that a course

of teaching in agriculture be introduced into every primary school in the country. Hanover, the oldest college in Indiana, has just

decided to admit young women to its instruction on the same terms as the young men. A University Normal School is now in session at the University of Virginia. This school was organized with the help of the Peabody Fund.

The study of the National and State Constitutions made obligatory in the public schools of Wisconsin has been attended with excellent results.

The colored school at Alleghenv has been abolished after a fiery fight in the School Board. Hereafter the colored children, will go to the white

The salaries of some of the teachers in the Worcester schools have ben slightly raised. The grammar masters, who have received lately only \$1,620 a year, are to have again their former salaries of \$1,800.

San Francisco pays a school carpenter \$150 s month, and is baggling over a proposition to pay the new kindergarten teacher \$50 a month. This shows the in elligence and common sense of the average school board. The movement for the higher education of women at Oxford University has been so successful that it is

necessary to enlarge Somerville Hall. A meeting, conducted by Lord Aberdare, has just been held in London for the purpose of providing for this enlargement. Mr. H. C. Sheldon, for five years past assistant professor of practical theology in Boston University, has just been promoted to the full pro-

fessorship. Caroline E. Hastings, M. D., for seven years lecturer and demonstrator in the Universities' School of Medicine, has been made Professor of A donation of \$500,000 has been made by an unknown gentleman to Hudson College. This is to be the means of removing the College to Cleveland.

The Louisiana University is to be entirely reor-ganized, the Board baving become convinced that some inherent cause of mismanagement. All the chairs of the college have been declared vacant. Elections to fill these positions will be made at a meeting of the Board at Baton Rouge August 4.

pils of the schools of Rockland, Mass., bave organpils of the schools of Rockland, Mass., nave organ-ized themselves into a Natural History Association which promises to be full of entertainment as well

SUBURBAN SEMINARY.—Boston-ave. and
167th st., reopens September 15.
Rev. EDWIN JOHNSON. which promises to be full of entertainment as well as instruction. They are making collections and have a room in which they often hold meetings and read papers. They deserve hearty praise, and their plan is cordially recommended to other schoolboys and girls.

President Newell, of the Maryland Teachers' Asthe other day the "teachers by accident"-the men was are making the school-room a half-way house to the charch of the bar, and the girls to whom the school-house would be a prison were it not that it gives them the means of dressing in a more captivating style, and when the days of hiring are accomplished, to purchase a wedding trousean. He uttered a bit of advice which tenchers decidedly need, trite as it is—that is, to accept nothing as right merely because it is customary, and nothing as wrong merely because it is new.

at the recent meeting of the Ohio teachers, the inculcation of morality in children, by means of the reading and memorizing of carefully selected litera-ture in schools. "Heretofere," he said, "the boy's education has been no broader than his business expeciations; his happiness as a man and his worth as a chitzen have not been taken into account. These principles are too narrow for an age that is looking for good men, as well as good accountants and grammarians. They are unnecessarily narrow. They leave broad fields of noble soil untilled."

What in this year of grace, 1880, the old fogy is still capable of saying may be seen in the recent address of Chairman Banks, of the Flintshire, Wales, Quarter Sessions. He complained that there was a tendency in the country to over-educate; the laboring classes were being educated above the station which Providence had intended for them. He wanted the laborer instructed to read, write, and keep such accounts as were useful to him in his walk of life, but to give him a superior education was to set class against class, and make them disatisfied with the position which Providence had calletted to them. He need to go also infants, achieves. Sciences, viz.a Ampie opportunity for athletic games, rowing, &c.

CORNELL UNIVERSITY.—Twelve courses the lead to degrees, viz.a Agriculture, Architecture, Aris, Chemistry and Physics, Civil Engineering, Literature, Mathematics, Mechanic Aris, Natural History, Philosophy, 8d-lends and Letters. Students not seek and Letters. Students not seek end Letters. Students not seek end and the providence see lect included and the providence see lect included and the providence seek end and the providence seek end letters. Students not seek providence seek end letters of the providence seek end letters. Students not seek providence seek end letters of the providence seek end letters of the providence seek end letters. Students not seek providence seek end letters of the providence seek end lette satisfied with the position which Providence had allotted to them. He used to go into infants' schools in that neighborhood thinking he could impart some knowledge to the young; but now when he went in he found the young people so highly edu-cated that he could teach them nothing, and he left quite ashamed. [Laughter.]

Ex-Superintendent Philbrick is quoted as saving, at the meeting of the American Institute, that "No first-class nuiversity in Europe is open to both sexes." Mr. Philibrick should be sure of his facts. Putting aside all the other universities instructing women, he might be reminded that in the University of Cambridge alone the ordinary academic lectures of twenty-nine of the professors are open to women as well as to men. Among these professors are Fawcett, Harcourt and Colvin. Mr. Phil-brick, as well as the students of Columbis, may be interested in hearing that the late Frederick Denison Maurice, Professor of Moral Philosophy at Cambridge, a man of deep and brilliant mind and lofty nature, once said that there was nothing about which he found the younger graduates at Cambridge more zealous than in endeavoring to put every academical advantage at the service of women. It is impossible to say for how much the higher e-lucation of women is indebted to the sympathy and courage of a number of Cambridge men. This is the formal statement of Principal Davis, of Queen's College. Oxford University, King's College, and the University of London are among the foreign institutions of the first rank now instruction women. At Oxford the girls are not classed separately, but with the boys, in the result of the examination. Philosophy at Cambridge, a man of deep and bril-

An Euglish writer says wisely concerning classical teaching: "Too many boys have been allowed to go through their school career under the impression that Greek and Latin were only invented to without ever realizing that these languages were used in daily life by men of like nature with our-selves, whose deeds and sayings are of personal insoon begin to draw upon the human interest of the classics. A hint here, an aneedote there, a parallel between some ancient event and one of recent occurrence, skiffully thrown in when the interest of boys is flagging, would, I believe, do much to make the teaching both of Greek and Latin more really useful. Grammatical knowledge would not suffer from boys being made aware that this was not the whole matter. Kather the dry bones of accidence and syntax would be breathed upon by a life-giving spirit, and assume a form and meaning to many a mind and assume a form and meaning to many a mind that was revolted by their seeming barreaness." It must be said that the sverage young collegian has very little idea of socient Greek and Roman manners and men, and takes about as much scuite and active interest in the life of remote times as he does in his sister's embroidery.

# Lost and Lound.

BANK BOOK LOST.—Bank book No. 413,949 of the Bowery Savings Bank is nelsang. The finder is requested to return it to the bank. If not restored before the 14th day of August, 1880, application will be made to the bank for a new book.

LOST.—In the Post Office on Monday, July will be paid if returned to the stamp window, Post Office, New York. horses, Carriages, harness, &c. FOR SALE.—A Park Top Phaeton, in perMINES AND MINING.

WEDNESDAY, July 14-P. M. With only few exceptions the prices of mining cocks are still seeking lower levels. To-day's specialty in that direction was Hukill, which, with sales of about 5,000 shares at both boards, fell from 1.50 to 1.15 and closed weak, without recovery. Less than six months ago this stock was regarded as cheap at 4.25 and since then there has been no public information concerning the condition of the property to change that opinion. Chrysolite again property to change that opinion. Chrysoite again was active between 10 and 9½, closing at 978, the same as yesterday. Little Chief fell to 7½, Silver Ciff to 4.40. Climax to 2.30 and Little Pittsburg to 3¾, South Hite being steady at 1.55 and Amerising from 76 to 83@80. Consolidated Virgmia was firm at 3.45, but California was weak at 1.90. Green Mountain rose from 3.10 to 3.25 and was in demand. This is about the only stock that bas not suffered during the recent decline. It has bad a fluctuation of ¼@3s, but has gravitated steadily toward better figures since it was put on the list at 2.25 last December. The reason for this marked exception is that the company treats its stockholders fairly, being always ready with information when it is desired. This, together with the regular monthly dividend of 5 cents a share, and an occasional extra dividend of 2½ cents, paid from surplus, has gained the public confidence. This fact shows that there is Eastern eaperital desirons of investing in mining enterprises when the enterprises are shown to be conducted on business principles. Among the fances Buckeye was largely traded in from 30 down to 27; at the lowest figure 11,000 shares were sold, followed by a recovery to 29. Great Eastern was weak at 56. Calaveras at 51@52, and Durango fell from 52 to 40@43. The markets closed weak.

N. F. MINING STOCK EXCLANGE SALES.

SECOND CALL—12:30 P. M. was active between 10 and 912, closing at 978, the

Bodes, Cal., July 14.—Buiwer, for week ending July 10, produced 820 cances of crude bullion and shipped \$8,691 33 to company's office. The Standard shaft was suma 9 feet during the week. There is no particular change in the formation, but the water has increased in the shaft. The stopes are all looking well.

San Francisco, Cal., July 14.—Bullion shipments on July account to date: Standard, \$94,600; Northern Belle, \$30,900; Eureka, \$44,300; Noondays, \$11,000. Idaho, Grass Valley, has declared a dividend of \$5. C. E. Itoffman left for Sonora, Mexico, to-day, to take charge of the Cajotes muss, incorporated under the name of the Cajotes have been made in the Salmon mine, hear Custer. Assays run bigh—\$14,000. One pao ran \$16, and the yield is seldom less than \$5. An offer of \$100-for the privilege of working the mine one hour was refused.

Leapyhles July 14.—The shaft on the Denver

The Crown Point Mining Company has levied an assessment of 50 cents per share.

N.ne bars of bullion, valued at \$33,929-24, were received in this city from the mises yesterday.

Stormont shipped \$8,300 on Tuesday.

Red Elephant shipped yesterday five tons of ore, assaying 135 onnees per ton.

The report of the superintendent of the Sacramento, dated July 9, states that the grade of ore from all the stopes is better, some sacks running as high as 523 onnees. Fifteen tons were shipped during the week, and there were fifty-live tons in re-

mento, dated July 9, states that the gride of ore from all the stopes is better, some sacks running as high as 523 onnees. Fifteen tons were shipped during the week, and there were fifty-five tons in reserve.

The south drift of the Bodie Bluff Consolidated is in 60 teet. The ledge is improving, showing more ore and of a higher grade.

The North Hite and Yosemite are working three shifts on the tunnel, which is in good ore.

The Black Hills Placer Mining Company, after the notice of the shortage of \$24,000 in the accounts of 1. M. West, the contractor, appointed a board of advisement, consisting of General Shaler, president; A. G. Bierce, general agent; and M. Willsee, chief engineer. This board met West at Deaiwood yesterday, and made a fall and satisfactory settlement whereby the work will be pushed forward to completion. All future disbursements will be made by the general agent. The company will sustain no loss, since at the time of making the contract with West securities were deposited for the faithful performance of the contract which amply indemnify the company.

A brief but company but seem issued. The grant comprises 60,458 acres, situated twenty-two miles southwest of Santa Fé, New-Mexico. The Placer Mountains, within its limits, contain numerous veins of goid, silver, copper and iron, some of which have been profitably worked for many years. Méssa, occupying 45,000 acres of the grant, contain practically inexhaustible auriferous gravel banks or placers. Thirty thousand acres of the grant are known to be underlind with valuable deposits of antinacite coal. Many eminent engineers and muning experts in this country and in Europe have examined and reported upon the property, and without exception have agreed as to its great value. An engineer is on the way to the mines to arrange for working the quartz lodes, to open the antinacite mines, and to secure a sufficient supply of water to wash the pl

The same kind of manipulation which was so so

Northern Pac. com, 26 2 26 21 WEDNESDAY, July 14-P. M.

cessful in the stock market late yesterday afternoon was even more successfully employed at the openthe specialties fairly danced. Western Union sold up to 107, S. Paul to 7734, Northwest to 914, and Lake Shore to 10442, exerting more or less favorable influence upon the prices of all other stocks. After the early advance there were reactions, but upon the whole the market remained pretty firm until within the last hour. After that time prices weakened so much that in many instances the last figures were lower than the final prices yesterday! notably, Western Union was 118 tower, Eric 4 and preferred stock 1, and Missouri, Kansus and Texas 38 per cent. The total business for the day was 194,500 shares, against 215,100 shares yester day. Erie (38,100) and St. Paul (39,650) contributed 77,750 shares to the total, and Western Union 23,500 shares. The total for the three stocks was 101,250 shares, leaving for all other stocks only 93,250 shares. Manhattan was a specially weak stock, declining to 2912, but rallying to 310 3138. The weakness was due to a published state ment of the New-York Loan and Improvement Company, which shows an apparent defint in that company's capital of \$162,700. We are informed that the company has lost none of its capital, but that the deficit grows out of a valuation of its its stockholders about \$6,000,000 of Metropolitas stock. The statement, however, shows that the Manhattan Company owes a loan to the New-York

Loan and Improvement Company of \$600,000.

The general market presented no special features other than those appertaining to an ordinary bro days' rise, which followed a three days' decline that culminated last Saturday. Darret the last three days the average operators have changed front, and new feel as confident of higher prices as last Saturday they were of lower prices, the figures being changed by advances of from 3 to 6 per cent. Whether the tre ting is large
